● Profile:

I am seeking an opportunity as a front-end developer with a focus on React. After completing a technical course where I had my first contact with programming logic and gained some knowledge in HTML, CSS, and JavaScript, I became very interested in the field, which I have been delving into/studying through courses, video lessons, and workshops.

● Skills and Competencies:

1. HTML, CSS, JavaScript, React, Python;
2. MySQL, ERDplus;
3. Microsoft Office Suite and Google Tools;
4. Jira, SCRUM Methodology;
5. Adaptability;
6. Creativity;
7. Quick learner.

● Main Projects:

Construfácil: Construction management system
A web application aimed at helping builders better manage their construction projects by managing expenses and materials, reducing waste, and optimizing time.
   ● (technologies used: HTML, CSS, JS, PostGreSQL, ERDplus, Jira, and Github)

Info Suplementos: Dietary supplements guide
A web application developed to help beginners in bodybuilding understand the purpose of each supplement, when and how to take them, and how to calculate their macronutrients.
   ● (technologies used: HTML, CSS, JS, and Github)

● Education:

   ● Technical Degree in information technology - CEMEP (completed)
   ● Bachelor's Degree in Computer Science - Unimetrocamp (ongoing)
   ● English Language Studies (ongoing)
